The journal retracts the article:

Ren Y, Lin Y, Zhu X, et al. Machine learning driven closed-loop system for co-pyrolysis of polluted soil and biomass: Design principles and multi-scale regulation mechanism for soil health. *Environmental Chemistry and Safety*, 2026, <https://doi.org/10.26599/ECS.2026.9600049>

This article has been retracted by the journal's editorial team. Following the journal's standard procedures, the Editorial Office together with the Editorial Board launched a formal investigation, which uncovered issues: undisclosed the usage of artificial intelligence(AI) tools in the manuscript, inconsistency between the figures, references and the main text.

Following confirmation of consent from all authors, the Editorial Board has reached the formal decision to retract this article. We regret this necessary retraction and offer our sincere apologies to the journal's readership for any confusion or inconvenience caused.

This retraction was approved by the Editor-in-Chief of the journal.
