

Journal of INTELLIGENT CONSTRUCTION

Vol. 2 No. 3 2024

清华大学出版社
TSINGHUA UNIVERSITY PRESS

Quarterly, started in 2023
Volume 2 / Number 3 / 2024

CONTENTS

Review

Practice and prospects for intelligent construction and smart operation of Lancang River Hydropower Projects

Hongqi Ma, Haibin Xiao

Advances in the development of piezoelectric smart aggregates for structural health monitoring

Jianpeng Jin, Wencheng Xu, Pengfei Li, Yuya Takahashi, Fuyuan Gong

Research Article

Numerical investigation of three-dimensional incompressible fluid flow in curved elastic tube

Peng Ni, Dehong Fang, Li Ai

Selecting deconstruction processes using virtual reality comparisons

Yinghui Zhao, Gabriel Earle, Yun-Ha Jung, Carl Haas, Sriram Narasimhan

Risk assessment of construction safety accidents based on association rule mining and Bayesian network

Hui Yao, Jianjun She, Yilun Zhou

Construction and application of a knowledge graph for the spatial arrangement of underground powerhouses

Han Liu, Zongliang Zhang, He Jia, Siteng Zhang, Lei Yan, Zhiyong Zhao

Roller-integrated compaction monitoring and assessment of high and low liquid limit silt subgrades using the Green spline interpolation algorithm

Yuchen Yan, Yanwen Zhu, Xian Yang, Lan Qiao, Chuping Wu, Zaizhan An, Qinglong Zhang, Ren Liu, Wang Guo

Intelligent control method and system for vibroflotation construction in hydropower engineering

Qixiang Fan, Guo Li, Xiaochun Jiang, Bin Ma, Tao Chen, Meng Li

ISSN 2958-3861
e-ISSN 2958-2652

Editors-in-Chief: Peng Lin, Jinsheng Jia, Zongliang Zhang, Ranjith Pathegama Gamage

Journal of Intelligent Construction

Editorial Board

Editors-in-Chief

Peng Lin

Tsinghua University, China

Jinsheng Jia

China Institute of Water Resources and Hydropower Research, China

Zongliang Zhang

China Power Construction Group, China

Ranjith Pathegama Gamage

Monash University, Australia

Associate Editors

Fuyuan Gong, Zhejiang University, China

Jiayu Chen, Tsinghua University, China

Liping Li, Shandong University, China

Jing Yuan, Tsinghua University, China

Michael Rogers, International Commission on Large Dams (ICOLD), USA

Hongxin Chen, Tongji University, China

Advisory Board Members

Luis Berga, Universitat Politècnica de Catalunya, Spain

Robin Charlwood, Robin Charlwood & Associates PLLC, USA

Yongcan Chen, Southwest Petroleum University, China

Qixiang Fan, China Huaneng Group Co., Ltd., China

Xiating Feng, Northeastern University, China

Chongqing Kang, Tsinghua University, China

Shucai Li, Shandong University, China

Chao Wang, Hohai University, China

Hao Wang, Shandong University, China

Xiaogang Wang, Institute of Water Resources and Hydropower Research, China

Heping Xie, Shenzhen University, China

Weilin Xu, Sichuan University, China

Denghua Zhong, China Agriculture University, China

Hehua Zhu, Tongji University, China

Editorial Board Members

Sangar Abdulkareem, General Directorate of Dam and Reservoir, Iraq

Federico Accornero, Shantou University, China

Mohan Prasad Acharya, NEA Engineering Company, Nepal

David Chua, National University of Singapore, Singapore

Enrique Cifres, International Commission on Large Dams, Spain

Lieyun Ding, Huazhong University of Science and Technology, China

Chongjiang Du, Tractebel Engineering GmbH, Germany

Malcolm Dunstan, Malcolm Dunstan & Associates, UK

Aries Firman, Indonesian National Committee on Large Dams, Indonesia

Liang Gao, University of Macau, China

Li Jiang, China Academy of Building Research, China

Masayuki Kashiwayanagi, Japan Committee on Large Dams, Japan

Zichang Li, Tsinghua University, China

Michel Lino, International Commission on Large Dams, France

Hongyuan Liu, University of Tasmania, Australia

Xiaoli Liu, Tsinghua University, China

Koichi Maekawa, Yokohama National University, Japan

Carlos Granell Ninot, SPANCOLD, Spain

Samad Sepasgozar, The University of New South Wales, Australia

Changping Sun, China Three Gorges Corporation, China

Tamon Ueda, Hokkaido University, Japan

Chao Wang, Louisiana State University, USA

Ruoqian Wang, Rutgers University, USA

Nuwen Xu, Sichuan University, China

Nario Yasuda, Japan Dam Engineering Center, Japan

Limin Zhang, Hong Kong University of Science and Technology, China

Maohua Zhong, Tsinghua University, China

Yaneng Zhou, Louisiana State University, USA

Editorial Office

Managing Editors

He Chen, Tsinghua University Press, China

Yanqiu Jin, Tsinghua University Press, China

Publishing Editor

Yanan Duan, Tsinghua University Press, China

AIMS & SCOPE

Journal of Intelligent Construction is a peer-reviewed journal for publishing original research papers, case studies, reviews and comments regarding the use of novel technologies in all domains of civil engineering, e.g., hydraulic engineering, structural engineering, geotechnical engineering, transportation, construction management, etc. The journal focuses on the application of advanced theories, methodologies, and tools, such as machine learning, sensors, robotics, 5G, the Internet of Things, artificial intelligence, building information modelling, computational methods, etc., in all stages of the construction life cycle, which makes the process more intelligent and efficient. The journal also covers other essential areas of civil engineering, e.g., planning and design, operation and maintenance, disaster mitigation.

Journal of Intelligent Construction offers readers an attractive mix of authoritative and comprehensive Reviews, original cutting-edge research in Communication and Full Paper formats, Comments, and Highlight.

Selected areas and topics of interests include, but are not limited to:

- Application of smart sensors in construction process
- Robotics, surveying, logistics, automated inspection
- Intelligent control systems
- Intelligent equipment for risk management
- Application of big data, cloud computing, block chain, etc., in civil engineering
- Application of machine learning, deep learning, etc., in design, project management
- Auto or intelligent equipment for construction process and risk management
- Application of novel techniques in environmental monitoring
- Novel modeling and computational methods
